

CSE327 Assignment 4: Active Contour (10 pts)

Due Oct 4 2023, 11:59PM, submitted via Brightspace

This assignment will implement the active contour algorithm introduced in the class.

- (1) Read in an image (a synthesized image is provided);
- (2) Manually select initial points along the object boundary;

- (3) Run the iterative active contour algorithm until convergence.

Upload your Matlab/Python codes along with brief comments/descriptions to Brightspace by the due date & time.
